M.S. = MEDIUM SIZE i.e. PLATE OUTER SIZE
F.S. = FULL SIZE i.e. PLATE OUTER SIZE

PRECAUTIONS TO BE TAKEN WHILE UNLOADING & FIXING RCC MANHOLE COVER / FRAME

1. UNLOADING

- a. The frames and covers have to be properly lifted from the truck and placed properly on the ground either manually or mechanically.
- b. At no point of time they should be un loaded on tyre on mud sack or heap of sand.
- c. They should be properly stacked adjacent to each other horizontally. They should never be placed on top of each other vertically.
- d. Proper care has to be taken while shifting material from one place to other.

2. FIXING OF COVER / FRAME ON CHAMBER

- a. The clear opening of the chamber should be same as that of manhole frame. It can be less than that of manhole frame but it should never be more than that.
- b. The frame is designed for compressive load only. Hence it should always have full support at the bottom. The collar of the frame should not overhang or have cantilever load.
- c. Proper fixing of the frame and cover is illustrated below.
